

Well, it's proven: Military dictatorships are killers and thieves. They have no shame in sacrificing the good people for the ambition and the sole benefit of their corrupt rulers. In Thailand for example, the brainless military authorities are stealing batches of **Pfizer** vaccine intended for health workers, those brave people who take risks every day by treating infected patients. Decidedly, the shit heads that run Thailand have not learned the lesson from its Burmese neighbor. Let's wish them a very bad good luck!

Eh bien, c'est prouvé : Les dictatures militaires sont des tueurs et des voleurs. Elles n'ont aucune honte à sacrifier le bon peuple pour l'ambition et le seul bénéfice de ses dirigeants corrompus. Tenez, en Thaïlande par exemple, les autorités militaires sans cervelle volent des lots de vaccin **Pfizer** destinés aux agents de santé, ces braves personnes qui prennent des risques tous les jours en traitant les malades infectés. Décidément, la merde qui dirige la Thaïlande n'a pas appris la leçon de son voisin birman. Souhaitons leur une méchante bonne chance !
