

To anyone who will listen. Today, fascists have managed to take power, one of the main reasons being that a portion of the citizens were scammed by crooks, and were not properly informed. **Now everyone is paying for the mistake.**

Even though credible informations are necessary and need to be widespread, writers and the sources of these informations want and need more money, and more registration than give them free for the greather good.

And average citizens make **no effort** to mobilize, or help their neighbors and loved ones to be properly informed neither.

Yet, According **Ali Velshi**/msnbc, "Supreme Court set to hear high-stakes case that could gut Voting Rights Act According to a report, if the justices throw away Louisiana's maps, 19 congressional seats could flip from blue to red in states across the country."

So as citizen if **your priority** is money instead of **SAVING DEMOCRACY**, then let the crooks win and suffer the consequences.

Otherwise, if you have some means, help writers to survive, in return the writers will have what they need to continue to help the poor to be well informed, and to act. 15-10-2025
